Education

Indian Institute of Information Technology (B.Tech)

Aug. 2018 – June 2022

Computer Science and Engineering, CGPA- 8.17/10

Kalyani, West Bengal

Technical Skills

Frontend Technologies: HTML/CSS, SCSS, Javascript, Typescript, ReactJS, NextJS, Bootstrap, Redux
API and Data Management: GraphQL, REST API, axios-hooks, react-hook-form
Tools and Platforms: GitHub, Git, Vercel

Experience

Levo.ai

June 2024 – Present

Frontend Engineer

Hyderabad

- * Worked with GraphQL APIs for efficient server communication.
- * Improved API test UX by simplifying steps for users.
- * Implemented JSON string highlighting for better key-value visibility when rendering request/response in the UI.

Cogoport

July 2022 – June 2024

SDE 1

Gurugram

- * Proficient in using the following tech stack: React.js, Next.js, HTML, CSS, SCSS and Javascript.
- * Wrote more than **2.5 lakhs lines of code** to develop and maintain React.js applications.
- * Led a team of **3-4 members** to deliver the product on the expected timeline.
- * Created a variety of emails template for customers to provide real-time shipment tracking updates and essential documents.
- * Engineered credit note creation system for **3400+** credit notes spanning **3000+** shipments.

Cogoport

Jan 2022 – June 2022

Associate Software Engineering Intern

Mumbai

- * Designed and developed reusable code components to enhance the platform's functionality and maintainability.
- * Developed a comprehensive Content Management System (CMS) from scratch, utilizing **Next.js** for the frontend and Node.js for the backend.
- * Implemented a user-friendly website creation feature using the **GrapeJS** library, enabling users to effortlessly design and customize their websites through intuitive drag-and-drop functionality.

GoBudGo

Aug 2021 – Dec 2021

Software Engineering Intern

WFH

- * Utilized a diverse tech stack including React.js, Material UI, HTML, CSS.
- * Designed reusable codes that could be used on other projects.
- * Ensured proper handling of user authentication tokens and implemented necessary security measures to protect user data

Projects

Portfolio | *HTML/CSS, SASS, NextJS, Axios-Hooks, PNPM, MongoDB*

July 2023 - Present

- * Developed a dynamic portfolio using **Next.js** for the frontend and **Node.js** with **MongoDB** for the backend, ensuring efficient data handling and a seamless user experience.
- * Created a custom request handling system using **axios-hook** and form submissions for enhanced performance and reliability.
- * Enabled 2-factor authentication with Google Authenticator OTP for real-time without the need for source code modifications.
- * Employed PNPM workspace for frontend and backend in a monorepo, optimizing code management and collaboration in multi-package environments.
- * Generated email notifications to receive feedback form submissions.
- * For Visit [Click Here](#)

Trillo | *HTML, CSS Flex, Sass*

Feb 2020

- * Used mainly CSS Flex property to align whole website.
- * Dummy frontend design for any hotel booking system.
- * For view [Click Here](#)

Toast Notification | *HTML, CSS, Javascript*

Sept 2023

- * Used CSS to design the toast and for animation.
- * Used javascript to play with HTML element to make toast appear.
- * For view [Click Here](#)
